

2D WAM

View-dependent, geometry-agnostic world modeling

- ⊗ Weak spatial dynamics modeling
- ⊗ Cross-view inconsistency
- ⊗ Unstable action prediction

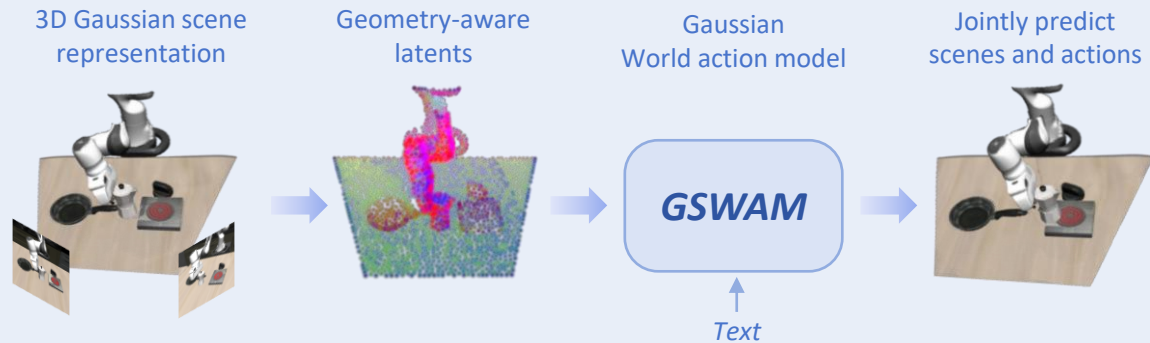

View 1 suggests moving right, while View 2 suggests moving left.

Our 3D WAM (GSWAM)

Geometry-aware world modeling in 3D latent space

- ✓ Spatial physical dynamics modeling
- ✓ Cross-view geometric consistency
- ✓ Spatially grounded action reasoning
- ✓ Robust action prediction
